That is not what the passage means.
Protagonist's Motivation?
Motivation?
- Duality of Man?
- Duality of Man?
- Discussion Prompts
It literally is if you read the actual sentence.
You skipped the metaphor and sprinted straight to the wrong answer.
And you turned one paragraph into a hostage situation.
THE GREAT GATSBY
Fantastic. Since you both care so deeply about being right, you'll be partners on the science project.
ENGLISH LIT

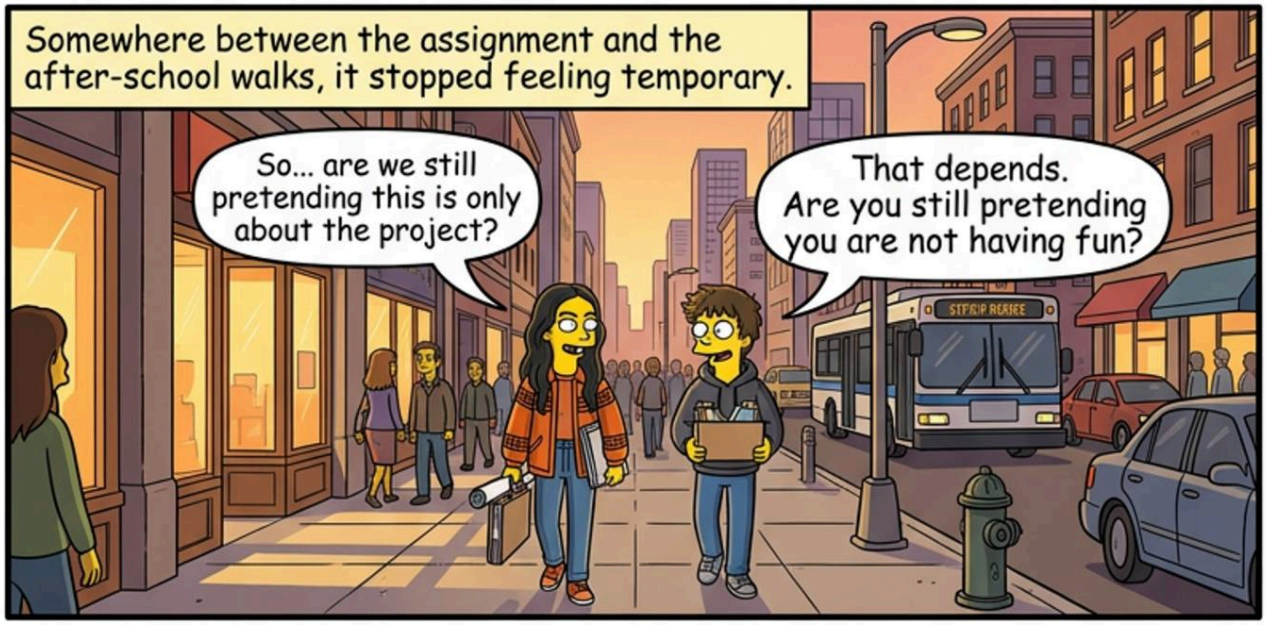

It was obviously sarcasm. The whole paragraph is basically rolling its eyes.
LITERARY TERMS
Annotating
REGLISTS
That is not how paragraphs work, Jess.
WRITTERS
Wow, thank goodness you're here to defend punctuation.

I am defending basic reading comprehension.
And somehow making it boring.
Excellent. Since you two have so much energy for collaboration, you'll be partners on the science project.

You have got to be kidding.
PROJECT DEA
DEADLINES
- Flyer after school
This feels legally excessive.
Library after school. If were being punished, lets at least be efficient.
SCHOOL LIBRARY
I hate that this is reasonable.

Dont be late.
I was about to say the same thing.
Bring ideas, not a dictatorship.
Bring effort, not excuses.
This is either going to be a total disaster... or the fun kind.
...befor a split second.

The project starts as a sentence and a sigh.
If we divide the work, we might survive this.
That is the **nicest** thing you have said to me.
No, look. If we test test it this way, the results actually make sense.
Okay... wow. That is actually smart.
You sound shocked.
Some discoveries are not in the data.
Sorry.
You can have it.
Do you want to keep working tomorrow?
On the project?
Sure. Definitely only the project.

Somewhere between the assignment and the after-school walks, it stopped feeling temporary.
So... are we still pretending this is only about the project?
That depends. Are you still pretending you are not having fun?

By then, every small errand had turned into one more reason to stay together a little longer.
We make a pretty good team.
Yeah. In class too.

When they came back to class, nobody had to be told things were different now.
We tested the final model three times to make sure the results held.
And when one part failed, we redesigned it together.

After the project, they started spending time together off-campus.
You know, the city is actually kinda nice.
Especially when you're with someone who isn't trying to sabotage you.
SPRINGFIELD HIGH SCHOOL
They found new things to bond over.
TACO
Look, they have the special edition of that comic we talked about!
You always find the best hidden gems.
Soon, it wasn't just about common interests...
I've never shared my art with anyone before.
And I've never seen anyone paint with so much passion.
And then, it just happened.
We make a pretty great team, don't we?
Yeah. The best. Everywhere.
MOE'S TAVERN

Haters to Lovers

Jess and Sam's forced partnership has fully transformed into a real connection. Working on the science project led them into shared afternoons around the city, where trust, humor, and affection grew naturally. On this page, they quietly acknowledge that what they have is bigger than schoolwork. By the time they present in class, they are no longer two opponents managing a task, but a seamless team everyone can see has changed.
